FUNCTIONAL OUTCOMES OF SLEEP QUESTIONNAIRE (FOSQ-10) Q6. Some people have difficulty performing everyday activities where they feel tired or sleepy. The purpose of this questionnaire is to find out if you generally have difficulty carrying out certain activities because you are too sleepy or tired. In this questionnaire, when the words 'sleepy' or 'tired' are used, it means the feeling that you can't keep your eyes open, your head is droopy, that you want to "nod off", or that you feel the urge to take a nap. These words do <u>not</u> refer to the tired or fatigued feeling you have after you have exercised. *Directions – Please tick a box for your answer to each question. Select only <u>one</u> answer for each question. Please try to be as accurate as possible*
