# NEEDS YOUR HELP!

## Could you be **one** of us?

Did you, your partner or someone you know have a baby and take part in an ultrasound study at Perth's King Eddies between 1989 & 1992?

Were you or someone you know one of the Raine Study kids?

If YES, we need your help to make our next research study in 2023 our biggest and best ever!

The Raine Study is UNIQUE

It is the ONLY research study in Australia which can use four generations of data from the same related group of people to conduct life-changing research from pre-birth to old age. But without all our participants staying involved our ability to do this is reduced.

Contact the Raine Study to find out more:
